

- ❖ Ethernet cables (Copper Cross-over or Straight-through depending on device).
- ❖ Cisco Packet Tracer software.
- ❖ Proper IP addressing plan.
- ❖ Understanding of direct device-to-device communication.

Design:

Working Procedure:

1. Opened Cisco Packet Tracer.
2. Placed **6 PCs**, **6 switch** and **necessary cables** on the workspace.
3. Connected each PC to every other PC (partial mesh) using Ethernet cables.
4. Assigned a **unique IP address** to each PC.
